EXPERIENCE 6 MONTHS

Backend Developer (Python/Django)

ProGlobal Technologies

Apr 2021 – Oct 2021– Islamabad

- Building Django Webapps with ultimate Security
- Fixing any Django Python bugs
- Building RESTful APIs (Django Python, Django Rest Framework)
- Integration of Third-Party Apps
- Adding user authentications and permissions
- Adding admin dashboard for managing site and database (Django-admin)
- Adding Custom Admin Panel (great-looking design)
- Integrating Data Scraping and Data Mining

PROJECTS

Disease Detection from Chest Xray

Final Year Project

- Model Training on Tensorflow using ResNet 50 (Accuracy: 93%).
- Deployment of Model on Flask (Python’s Framework).
- Classifies chest xray images to one of the 4 classes (Normal, Pneumonia, Tuberculosis, Covid-19).

Stock Prediction Website

Made for Client

- Fetching live data of stocks for Google, Amazon, Microsoft and Apple.
- Using that data, the predictions of stocks was made.
- The app was built using Pandas and Django framework.

Automation of Mobile Purchasing System

Made for Client

- Made to solve the problem for local mobile phone purchasers.
- The ID cards of the seller is stored in the database for lifetime. The app also calculates the profits.

Shared Quotes Website

Made for Client

- All Authentication of this website was handled using Auth0.
- Registered users are allowed to post quotes.
- Users are allowed to modify their quotes only.
- Shared Quotes are fetched from an API call.
